

[A David Aladin](#)

27 March 2013 (the day before his b-day...)

In Greneoble for an experiment that will prove if I've been right or wrong for 11 years, after publication of my still polemic PhD work... they gave me the room 101...

[J. V.](#) Cool 😊:-) How do you produce the neutrons in the first place?

.

[Like](#)

[Manage](#)

[A David Aladin](#) Two ways: either with a Low power nuclear reactor not producing energy (like here, in Grenoble or at the CEA in Saclay, where i did my PhD), or by hitting a metal target with super high energy protons accelerated by particle accelerators (in my work place in the UK)

[A David Aladin](#) It is a good one dear long time missed friend & secondarily colleague :

celebrating doing the crystallography on the subject that I like!

.

[Like](#)

[Manage](#)

J. I hope you were right, let me know the result!

.

For all who got fooled, someday, happy fools day !

"But that's the way that you are
And that's the things that you say
But now you've gone too far
With all the things you say

Get back to where you come from
I can't help it

Under the april skies..."

We won't get folled again!!!

[April skies \(The Jesus And Mary Chain\) & Lyrics](#)

Hey honey what you trying to say As I stand here, don't you...
